

Cover Letter – Full Stack Developer

Dear Hiring Team,

I'm a Full Stack Developer with hands-on experience in React, Next.js, JavaScript, TypeScript, Node.js, NestJS, MongoDB, and PostgreSQL.

I've worked on **HRN TMS**, developing employee management, student management, attendance, and CV management features. I've also built a **RAG (Retrieval-Augmented Generation) system** involving document parsing, chunking, embeddings, and AI integration.

I'm comfortable working across frontend and backend, building APIs, integrating databases, and developing scalable, user-friendly applications. I'm eager to bring my technical skills, problem-solving ability, and willingness to learn to a global team.

Thank you for considering my application.

Best regards,

Madhav Banjade
